SUMMARY

Informatics graduate from Universitas Gunadarma (GPA: 3.76) specializing in Machine Learning (Computer Vision) and Fullstack / Mobile Development. Built and deployed a hybrid Autoencoder-CNN brain tumor classifier reaching 95% test accuracy as a public web diagnostic app. Experienced across the complete engineering lifecycle from model training (Colab/Kaggle) to production services with Python (Flask), TypeScript, React Native (Expo), and modern relational databases.

EDUCATION

Universitas Gunadarma

Bachelor of Science in Informatics; GPA: 3.76 / 4.00

Depok, Indonesia

Graduated: Aug 2026

- **Undergraduate Thesis:** Brain Tumor Classification on MRI Images Using a Hybrid Autoencoder and CNN Architecture with CLAHE Preprocessing Optimization (Defense Passed, 2026).

TECHNICAL SKILLS

Machine Learning & CV: TensorFlow, Keras, CNN, Autoencoder, Scikit-learn, OpenCV, CLAHE, Anomaly Detection

Web & Backend: Python (Flask), TypeScript, JavaScript, Node.js, HTML5, CSS3, Streamlit, Railway, Vercel

Mobile Development: React Native, Expo, Expo Router (File-based Navigation)

Databases & Cloud: LibSQL / Turso, Microsoft SQL Server, Oracle Database, Relational DB Design, SQL

Developer Tools: Git, GitHub, Google Colab (GPU), Kaggle, Postman, Appetize.io

PROJECTS

Brain Tumor MRI Classification: Hybrid Autoencoder + CNN | TensorFlow, Flask, OpenCV

2025 – 2026

- Engineered a deep learning pipeline classifying 4 MRI classes (7,022 images) with CLAHE contrast optimization.
- Achieved 95% test accuracy (0.95 macro F1); integrated Autoencoder (SSIM 0.93, MSE 0.00135) for anomaly verification.
- Deployed live diagnostic web app on Streamlit ([Live Demo](#)) and published training pipeline on Kaggle.

Bloxbboxd — Social Discovery Platform for Roblox | TypeScript, Turso (LibSQL), REST API

2026

- Built and deployed a production web platform to log, review, and track Roblox games ([bloxbboxd.vercel.app](#)).
- Integrated external Roblox APIs with Turso (LibSQL) edge database for low-latency review cataloging.

Motion-fits — Mobile Fitness Tracker | React Native, Expo, Expo Router

2026

- Engineered a cross-platform fitness tracker using Expo Router with modular workout logging and state persistence.
- Deployed an interactive cloud browser simulation on Appetize.io: [Interactive Web Demo](#).

Village Activity Reporting App (SPKPPSU) | TypeScript, PWA, Cloud Database

2026

- Built a Progressive Web App (PWA) facilitating real-time daily activity logs for field officers and admin oversight.
- Implemented offline-ready caching to preserve report generation functionality in weak network zones.

CERTIFICATIONS & TECHNICAL TRAINING

Samsung Solve for Tomorrow (SFT) 2025

Jakarta, Indonesia

Design Thinking Workshop Completion (Samsung & Skilvul)

Jun 2025 – Jul 2025

- Completed training on Problem Identification, User Needs Research, and AI & IoT Solution Ideation[cite: 2, 11].
- Scored **92.1** on the Preliminary Concept Paper for technical social innovation[cite: 2, 11].

Dicoding Indonesia

Online

Belajar Dasar AI (Certificate ID: 53XEKL2LKXRN)

Mar 2025

- Mastered fundamentals of Artificial Intelligence, Machine Learning workflows, and Deep Learning applications[cite: 10].

Universitas Gunadarma Computer Laboratory

Depok, Indonesia

Database Competencies & Technical Systems Certifications

2025 – 2026

- Advanced Database Systems (June 2026)[cite: 9, 15], Fundamentals of Database Systems (Sept 2025)[cite: 14].
- SQL Server for Intermediate (Aug 2025)[cite: 13], Oracle for Intermediate (Feb 2025)[cite: 12].

LANGUAGES

Indonesian: Native

English: Working Technical Proficiency (comfortable reading technical documentation, codebases, and technical communication)
